

Oracle Database Appliance X10

Greater performance and value for small to medium Oracle Database deployments

Alexandre Fagundes

Cloud Architect, Oracle Latin America

Six common database deployment challenges

Budgets: Tight funding limits the number and size of resources that can be deployed

Expertise: Skill gaps hinder configuring, patching, manage, and securing systems

Integration: Multivendor solutions require additional integration and management

Performance: Demanding database workloads require high speed and continual tuning

Security: Maintaining security is an ongoing cross-stack challenge

Continuity: Protecting the business against ransomware, failures, and human error requires backing up databases and providing high availability and disaster recovery

Commodity hardware vs engineered systems

Oracle Engineered

- ⑩ Fully integrated SW & HW
- ⑩ Purpose built appliances engineered for simplicity, optimized for database
- ⑩ Single vendor
- ⑩ Public cloud integration

Commodity

- ⑩ Require multiple vendors and self integration
- ⑩ No unified management
- ⑩ No end-to-end support
- ⑩ Not cloud-ready

Oracle Database Appliance integrates software, compute, storage, and network resources to deliver database services for a wide range of Oracle Database applications.

Five reasons why Oracle Database Appliance is a better choice

Simple

Pre-configured engineered solutions offer time savings, simplicity, and oracle integrated support.

Database optimized

Top-tier performance without extensive tuning, enhancing system efficiency.

Affordable

Predictable costs, reduced ownership expenses, and resource allocation for core business initiatives.

Secure

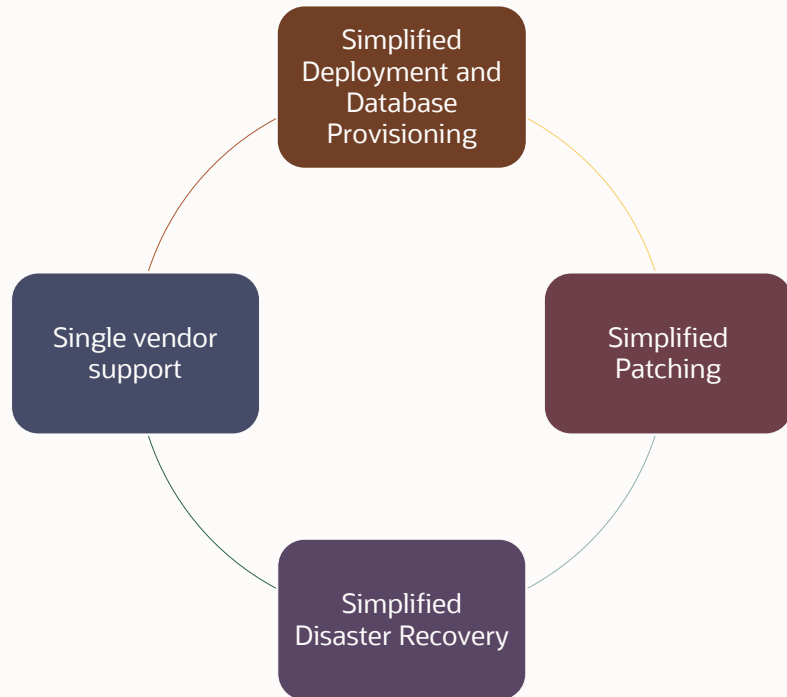

ODA prioritizes security through comprehensive appliance design, & end-to-end security enhancements.

Reliable

Engineered for high availability and built-in redundancy, ensuring rock-solid reliability.

Simple

Oracle Database Appliance offers seamless integration and automation that simplifies the deployment, management, and utilization of databases and applications.

The screenshot displays the Oracle Database Appliance web interface. The top navigation bar includes 'Appliance', 'Database', 'Object Store', 'Monitoring', and 'Activity'. The left sidebar lists 'Appliance', 'Network', 'Oracle ASR', and 'Patch Manager'. The main content area shows 'Appliance Information' with details like ID, Platform, Data Disk Count, CPU Core Count, and Created date. Below this is 'System Information' with fields for Host Name, Domain Name, Time Zone, DNS Servers, and NTP Servers. At the bottom is a 'Disk Group Information' table with columns for Name, Redundancy, Physical Total Space, Physical Free Space, and Logical Free Space. A 'Refresh' button is located to the right of the table.

Name	Redundancy	Physical Total Space	Physical Free Space	Logical Free Space
DATA	FLEX	9.31 TB	8.81 TB	2.93 TB - 4.40 TB
RECO	FLEX	2.32 TB	1.72 TB	589.07 GB - 883.61 GB

**Stand up system and begin loading data
in 60 to 90 minutes**

Database optimized

Oracle Database Appliance is easy to deploy and use with unique features that increase performance, efficiency, and cloud integration while simplifying data integration and management.

Affordable

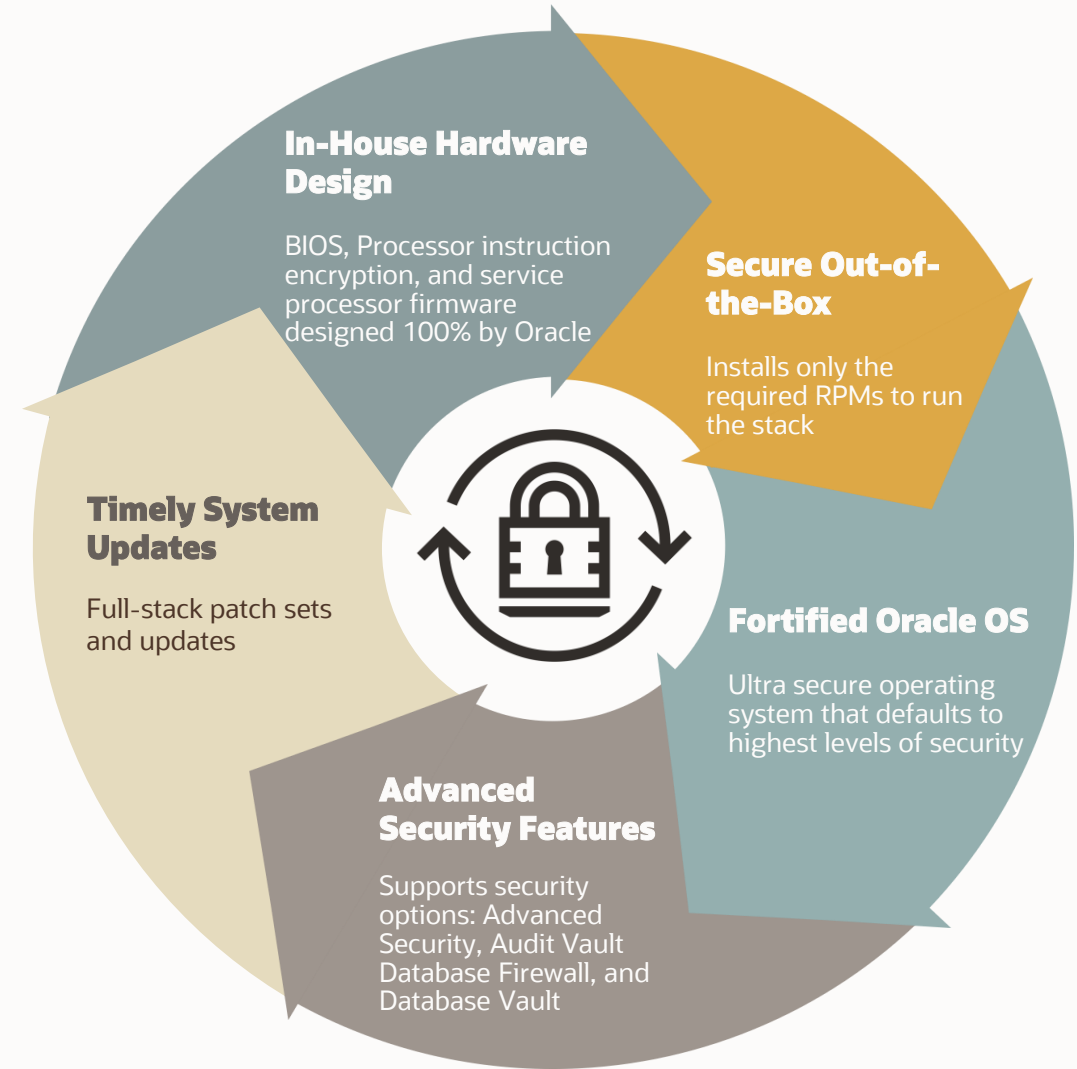

Oracle Database Appliance empowers customers to operate their businesses with fewer, highly automated, and database-optimized systems. This approach effectively reduces licensing and management expenses, resulting in a significant reduction in overall costs.

Key Benefits Compared to DIY

- **Flexible Database Licensing**
- **Rapid Deployment**
- **Streamlined Maintenance**
- **Significantly Reduced TCO**

Secure

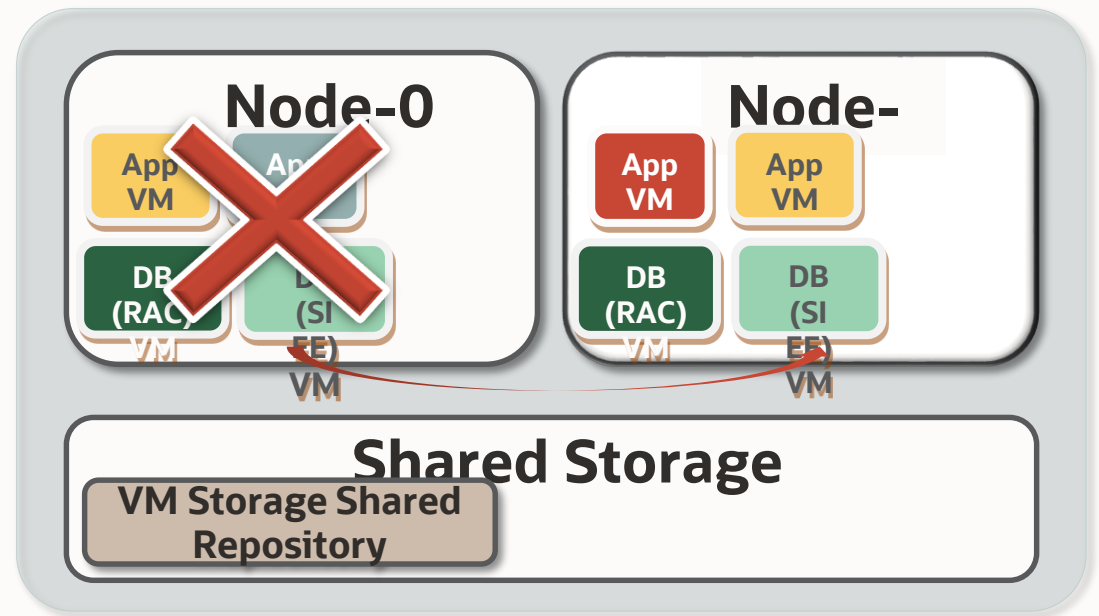

Oracle Database Appliance provides a comprehensive and seamlessly integrated security framework, ensuring the protection of your data and infrastructure at every step of its design.

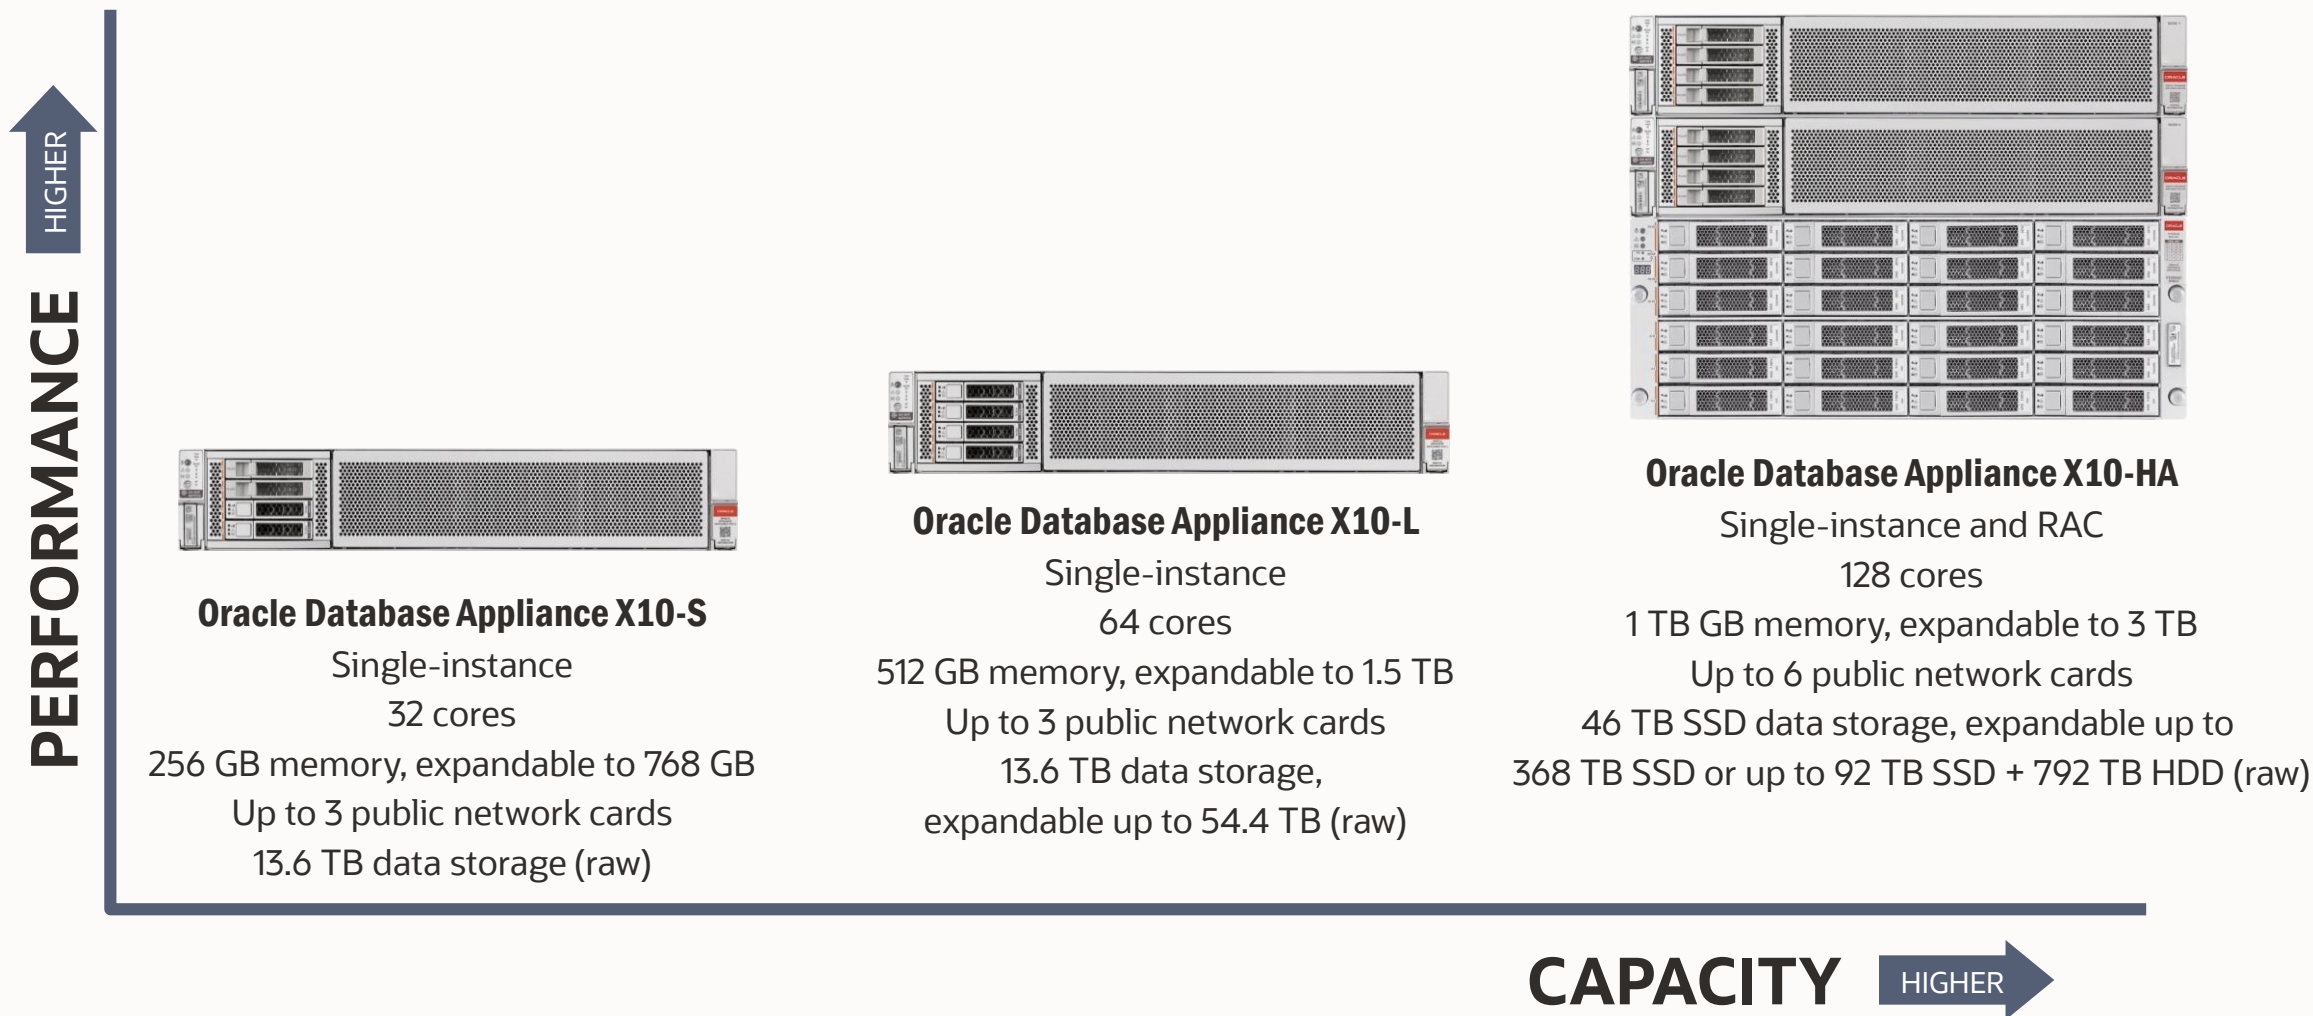

Reliable

Oracle Database Appliance is purpose-built for uninterrupted operations with rock-solid reliability, providing continuous uptime and peace of mind.

- Built-in redundancy
- Engineered for high availability
- Continuous uptime
- Integrated Oracle Real Application Clusters & Data Guard support

Introducing the Oracle Database Appliance X10 model family

Oracle Database Appliance | High-Availability Configuration

	V1	X3	X4	X5	X6	X7	X8	X9	X10	V1 – X10 Growth
SSD Storage (TB, raw)	---	---	---	3.2	48	128	368	368	368	115 X
HDD Storage (TB, raw)	12	36	36	128	---	300	504	648	792	66 X
CPU (cores)	24	32	48	72	40	72	64	64	128	5.3 X
Max Memory (TB)	0.2	0.5	0.5	1.5	1.5	1.5	1.5	2.0	3.0	15 X
Ethernet (Gb/s)	48	80	80	80	80	100	300	300	300	6 X
Max Read IOPS	4,466	6,500	6,500	300,000	2,250,000	2,250,000	2,250,000	2,880,000	3,251,000	727 X
Bandwidth (GB/sec)	3.0	5.3	5.3	6.0	22.2	22.2	22.2	23.0	29.6	9.9 X

Oracle Database Appliance | Single-Node Configuration

	X6 Oct 2016 E5-2630 v4	X7 Oct 2017 Xeon 6140	X8 Sept 2019 Xeon 5218	X9 Jun 2022 Xeon 4314	X10 Sept 2023 AMD 9334	X6 – X10 Growth
SSD Storage (TB, raw)	28.8	51.2	76.8	81.6	54.4	1.8 X
CPU (cores)	20	36	32	32	64	3.2 X
Max Memory (TB)	768	768	768	1,024	1,536	2.0 X
Ethernet (Gb/s)	60	50	150	150	150	2.5 X
Max Read IOPS (Million)	2.2	2.68	3.35	4.83	6.83	3.1 X
Bandwidth (GB/sec)	19.2	25.6	25.6	75.9	79.6	4.1 X

Improved Oracle Database Appliance X10 capabilities

New 4th-gen 32-core AMD EPYC™ processors

- Double the core count over X9
- Up to 50% more DDR5 memory
- 50% more memory channels

Up to 150% improved OLTP performance over X9 at the same entry prices

High-capacity model offers:

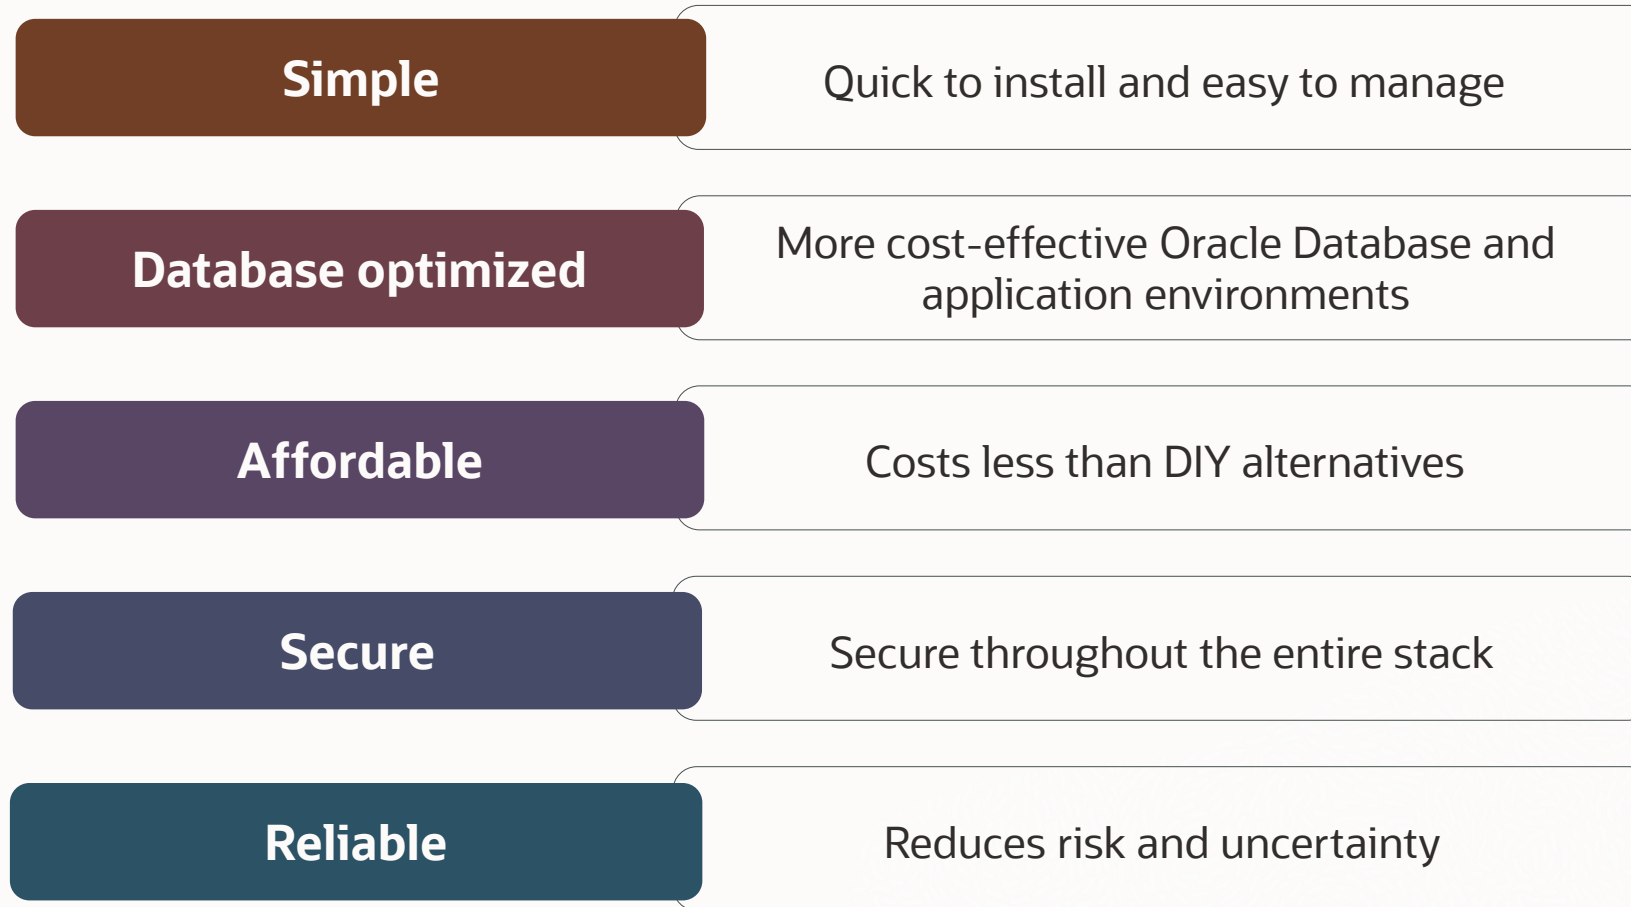

- 22% greater data capacity
- Larger database shapes
- Better database consolidation
- Enhanced solution-in-a-box capabilities for application and database VMs

Significantly enhanced price-performance ratio

Customer Stories

Oracle Database Appliance customer successes

MITEC accelerates growth with Oracle Database Appliance

“Oracle Database Appliance gives us peace of mind and confidence in our operation. The security, availability, and performance elements of the database are very important in our industry; we feel we chose the right ally.”

Edgar de la Luz

Director of Technology, MITEC

Business Challenge:

Mercadotecnia Ideas y Tecnología, or MITEC, has a mission to ensure fast payments for the 20,000 small- and medium-size merchants it serves. MITEC began working with Oracle more than 17 years ago. Today the company stores all its information in Oracle databases, providing high performance and scalability.

Results:

- ✓ Empowered MITEC to achieve 0.003-second transaction time
- ✓ Achieved 99.9% availability
- ✓ 6X faster replication speeds
- ✓ 90% approval rate
- ✓ That ratio of card vs. digital transactions reversed during the pandemic—60% of transactions became digital

Electrohuila slashes data processing time with Oracle

“Oracle’s experience, support, guidance, quality of staff, and product maturity gave us a lot of peace of mind.”

Luis Ernesto Luna

Project Manager, Electrificadora del Huila

Business Challenge:

Electrificadora del Huila (Electrohuila) provides electricity in the region around Colombia’s capital city, Neiva. At the end of 2020, Electrohuila had about 409,000 users. The company’s computing infrastructure couldn’t process that information fast enough to meet the operation’s needs.

Results:

Electrohuila chose Oracle Database Appliance. The utility’s market study concluded that Oracle provided the best option for hardware plus software engineered systems, and that it would help the business meet data processing needs

- ✓ Reduced the time needed to process about 2.8 billion records daily, from 12 hours down to approximately 2 hours
- ✓ The company can now meet data processing needs
- ✓ The Oracle solution provides data about both sales and collections from customers
- ✓ Helped the team improve the quality and reliability of information

Food distributor Hill Brothers cuts costs and downtime with Oracle

“We can always trust that Oracle Database Appliance won’t fail us. It has been running uninterrupted since 2018.”

David Piñeiro

Chief Financial and Strategic Officer, Hill Brothers

Business Challenge:

Hill Brothers is a Puerto Rico-based food-distribution company. The business’s high transaction and data volume requires robust database software and hardware to keep inventories and customer transactions up to date.

Results:

Hill Brothers integrated Oracle Database Appliance and eliminated crashes and saved the cost of manual billing.

- ✓ Availability reached 99.7%
- ✓ Operating savings reached \$60,000/ year
- ✓ Oracle Database Appliance runs purchases, sales, inventory, accounts receivable, and payable
- ✓ Printing purchase orders reduced to 3 sec. from 15 sec.

Rede Bistek gains productivity with Oracle Database Appliance

“We saw an immense productivity improvement. Some jobs and routines that used to take hours to run now take just minutes.”

Tatiana Mendonça

Technology Director, Rede Bistek

Business Challenge:

Brazilian supermarket chain Rede Bistek needed a new data management solution to bolster its digital business efforts. In addition, the company sought to evolve its cybersecurity strategy, including meeting the requirements of new legislation such as the Brazilian General Data Protection Law (LGPD).

Results:

- ✓ Increased its processing performance and storage capacity
- ✓ Routine tasks that used to take hours to execute are now done in a matter of minutes
- ✓ Database management has become much faster and more efficient
- ✓ Improved cybersecurity and reliability
