

Cloud Security: Preparing for The New Normal

Alexandre Fagundes
Cloud Architect, Oracle Corporation

Safe harbor statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

Enterprise Security Today

Humans are
part of the
problem

33%

Of organizations worldwide
have experienced a
ransomware attack or breach

4M

Global positions that cannot be
filled due to the cybersecurity
talent shortage

82%

Of data breaches involved the
“human element”

Top Enterprise Security Concerns

Ransomware

Compliance Requirements

What if we....

Made security
prescriptive + integrated
into the platform

Offer best of breed
security + choice by
bringing partner
ecosystem together

Convert security to trust,
and make it a business
driver

Simplify your ability to
assure with easy to use
auditing & reporting

Oracle's approach to security and privacy on the cloud

Simple & Effortless

Oracle offers simple & prescriptive services

Deeply Integrated

Oracle provides an integrated experience across IaaS, SaaS, and multiple clouds

Complete Control

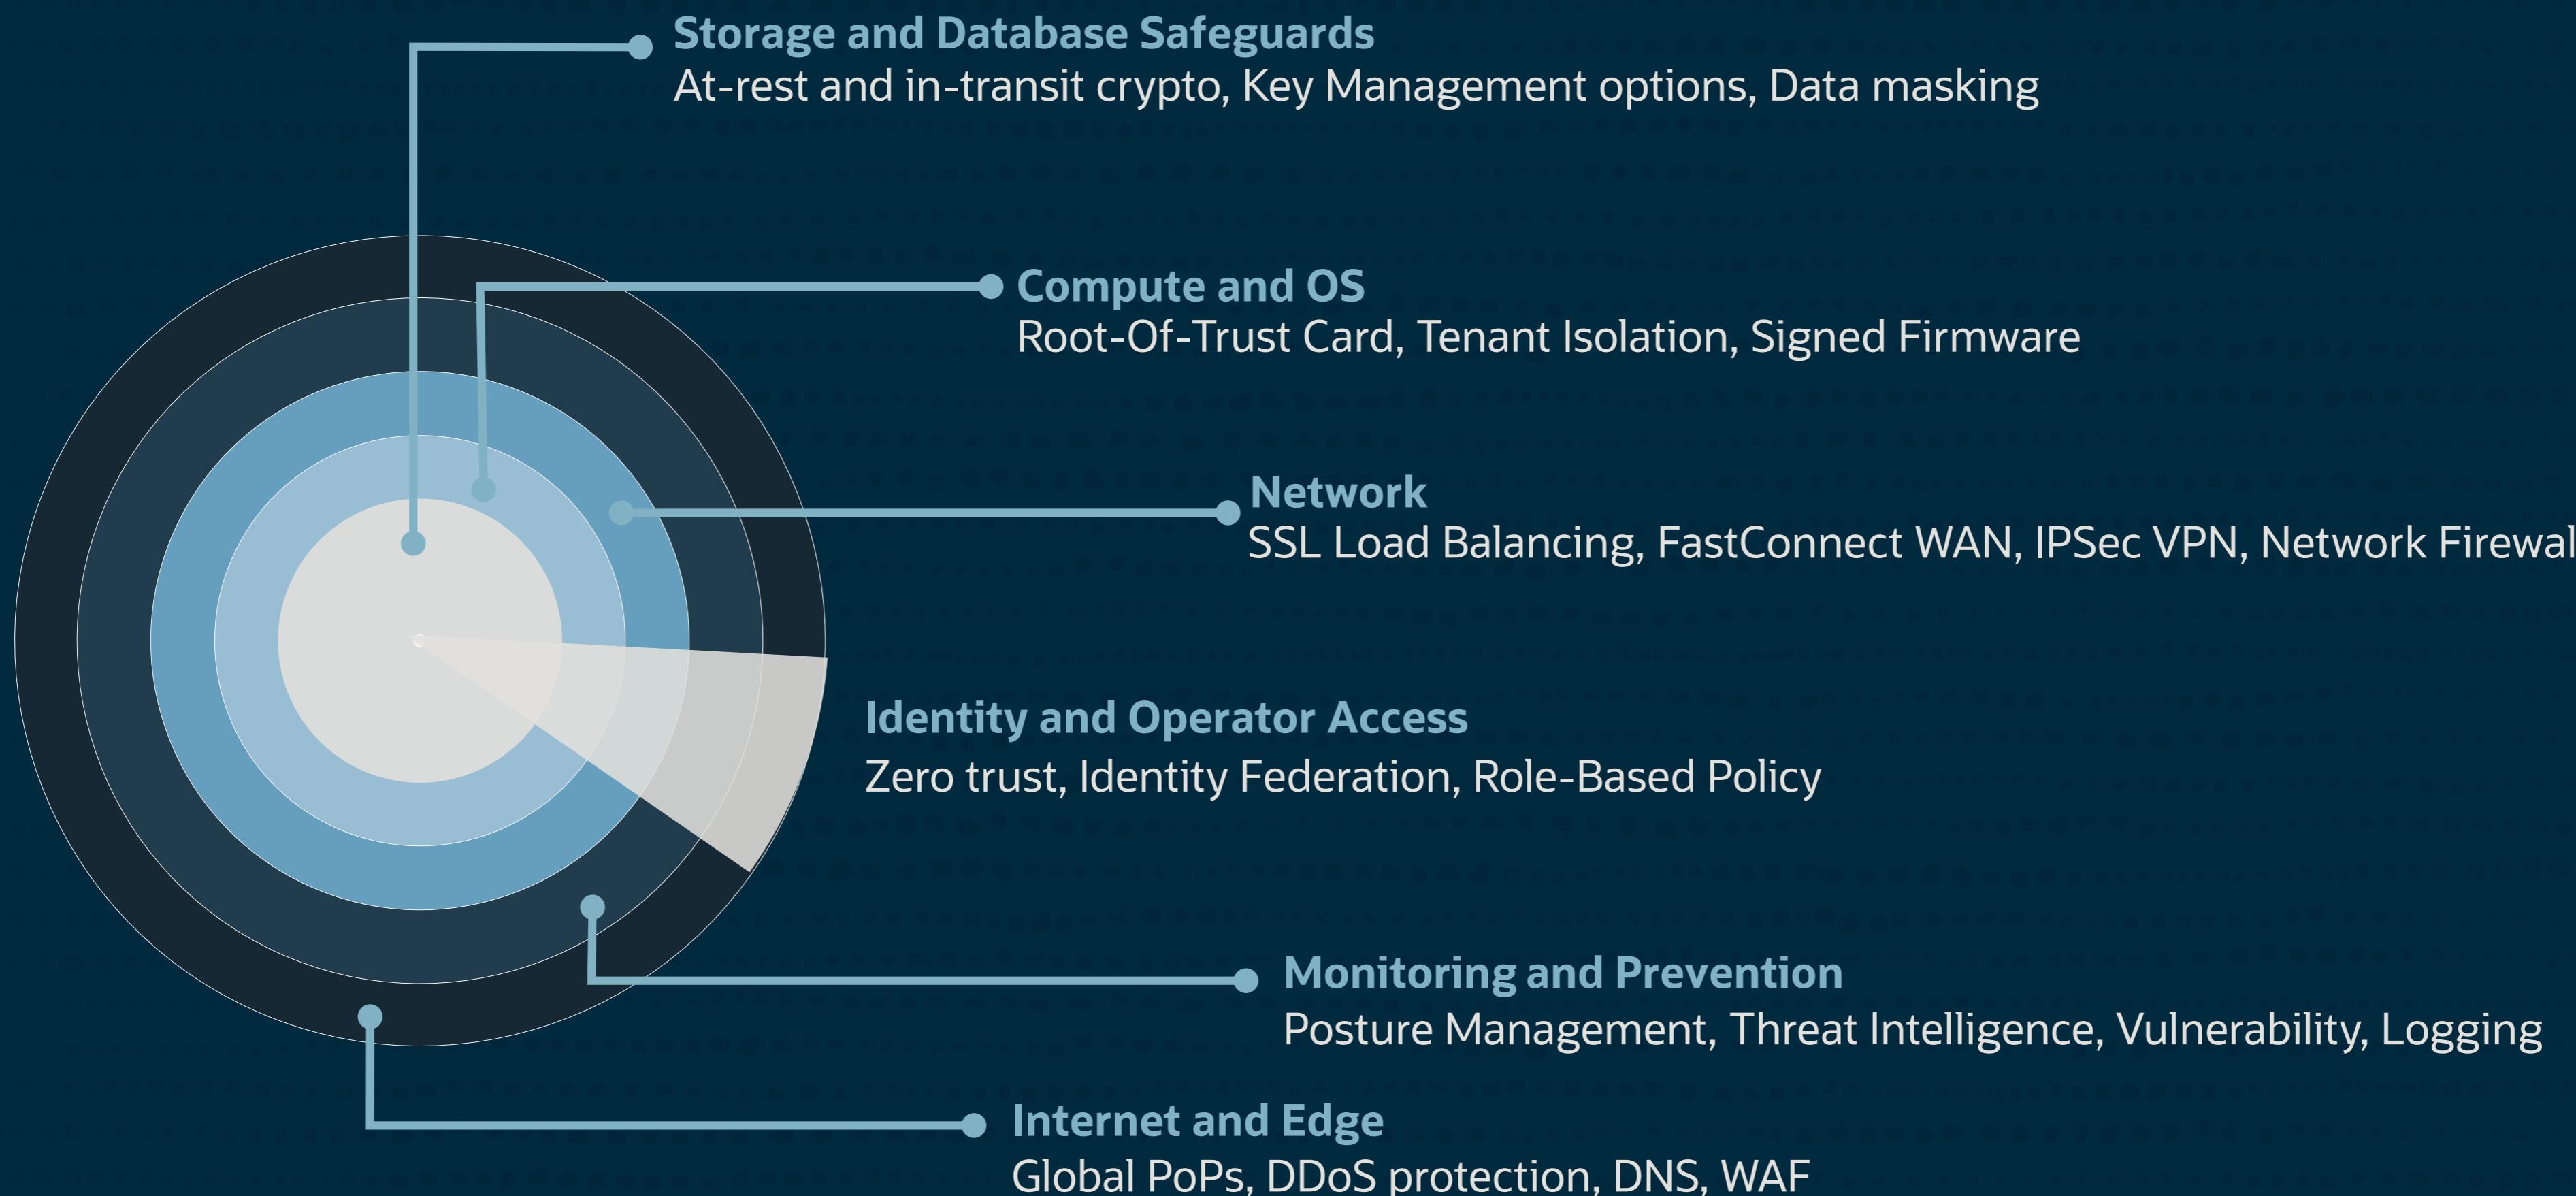

Oracle offers security controls regardless of where your applications and data reside

Simple and Effortless

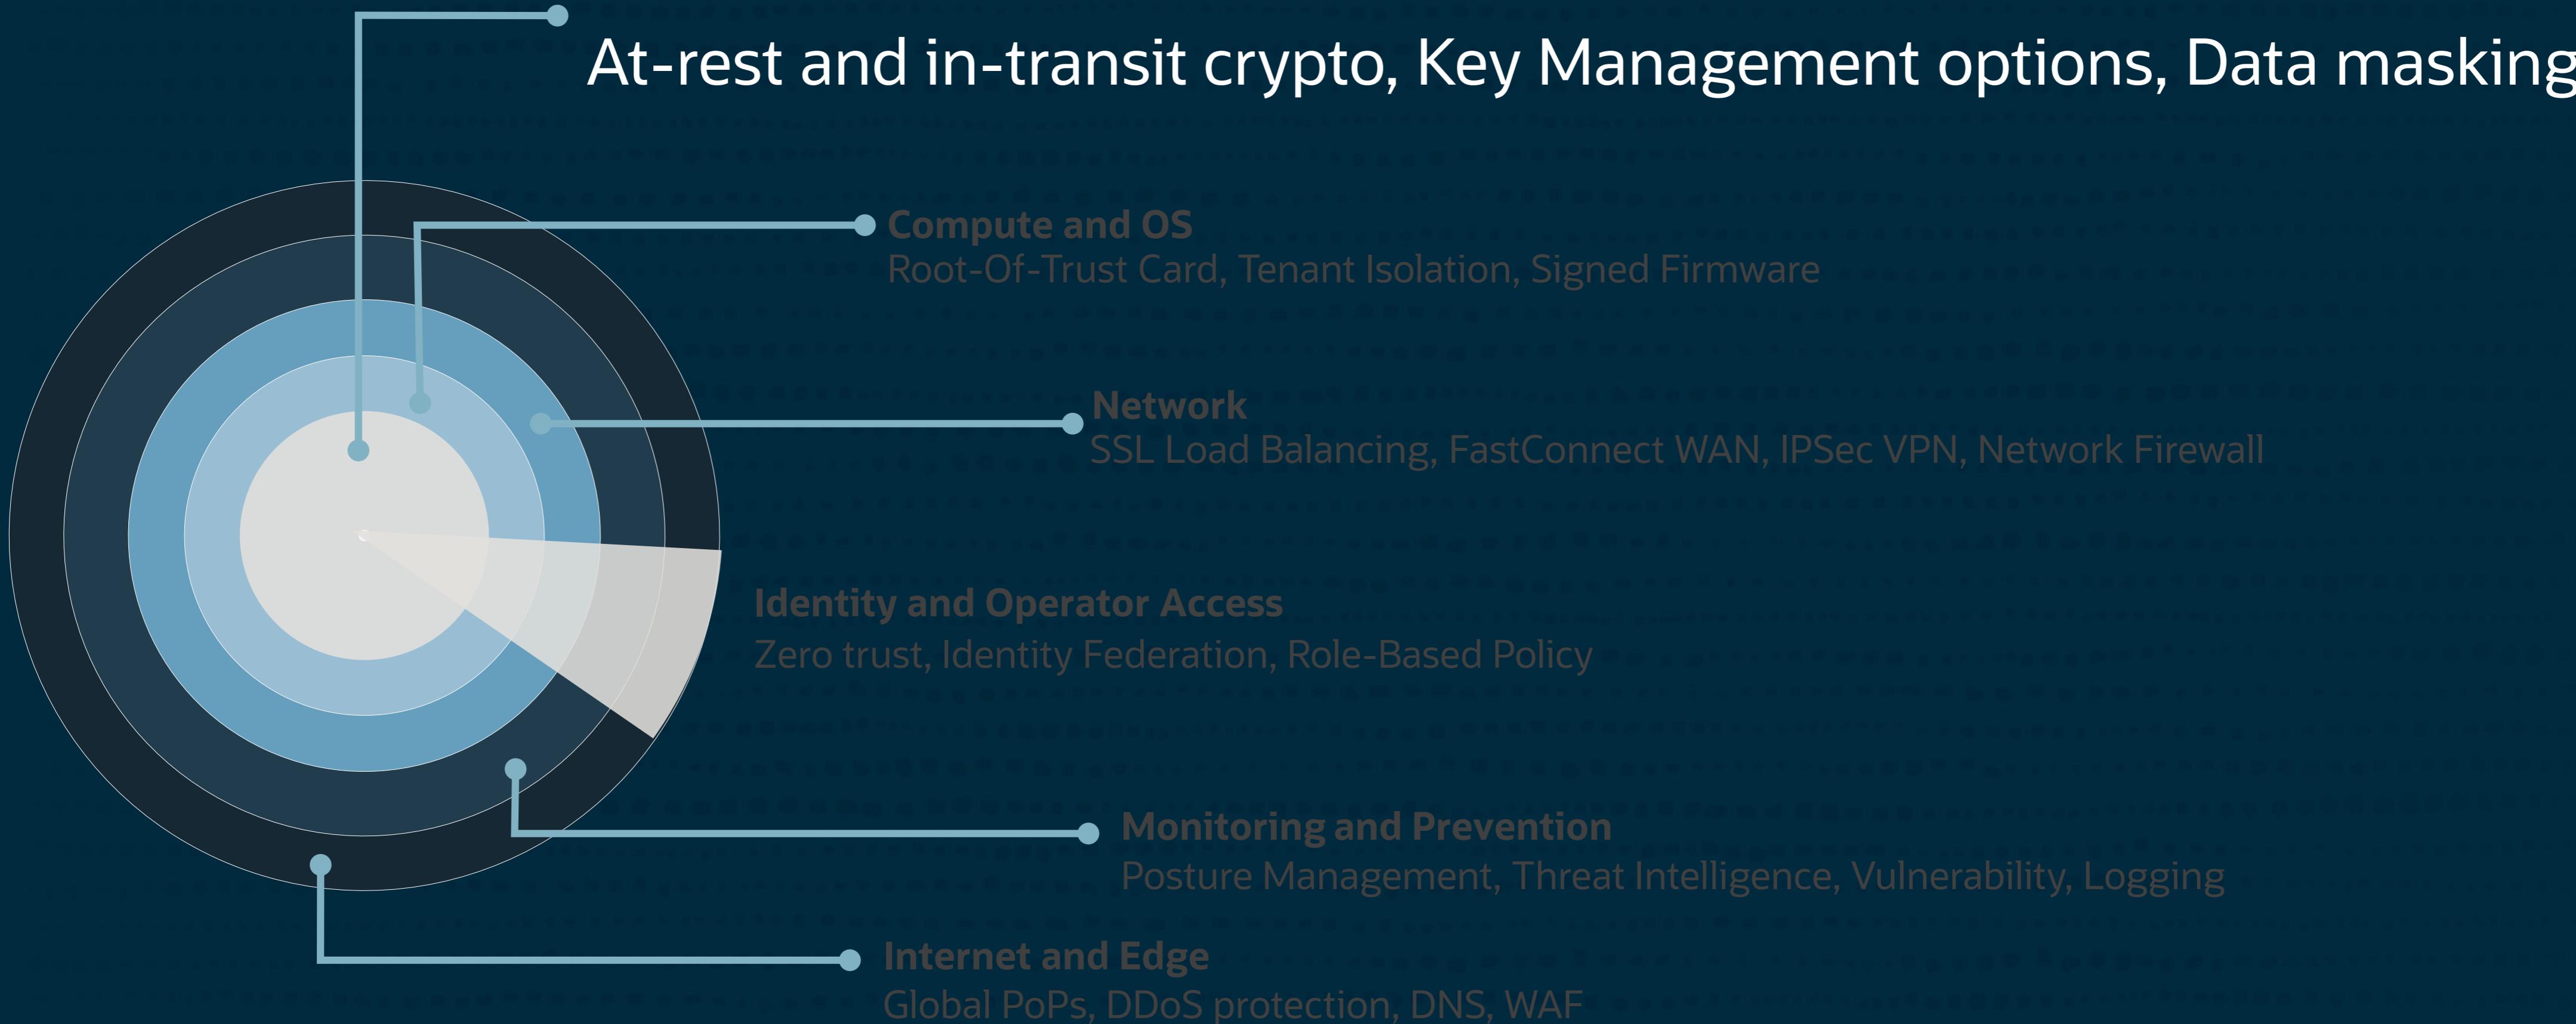

Oracle Security defense in depth

A complete solution with security built-in at every layer

Storage and Database Safeguards

GENERAL AVAILABILITY

Oracle Data Safe

Unified oracle database security control center

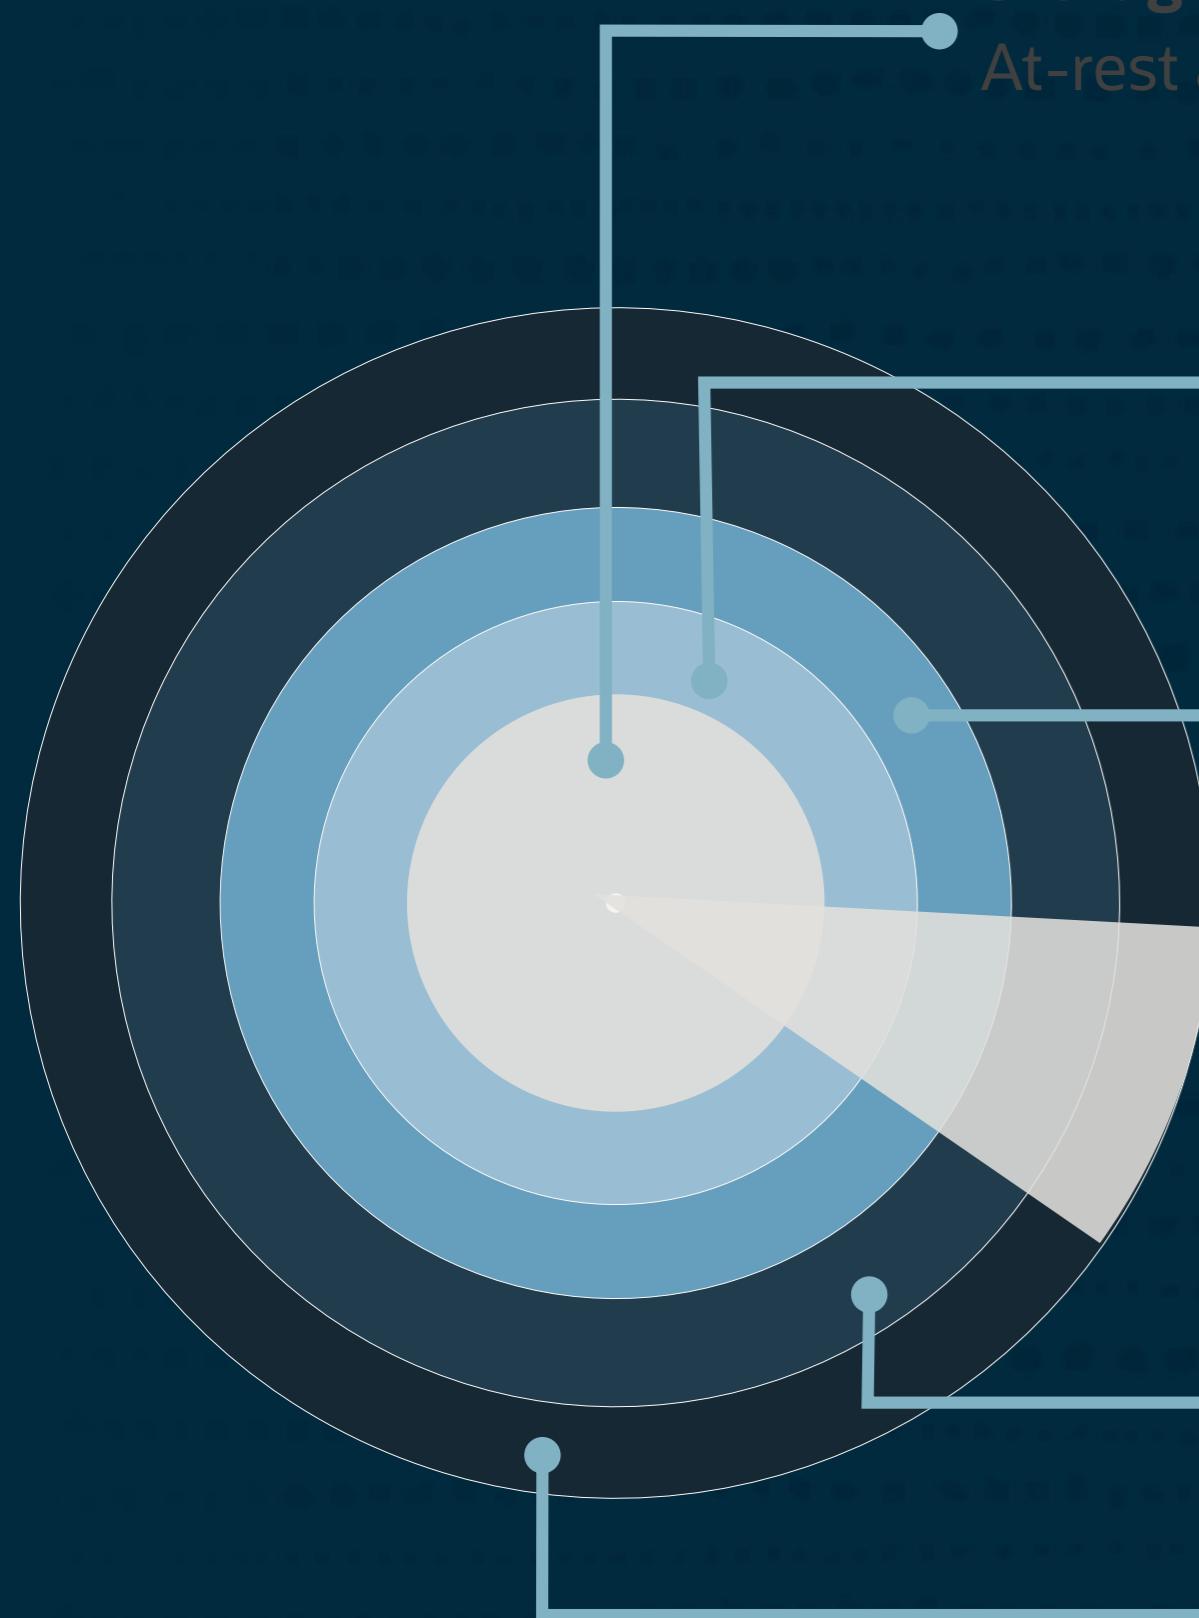

- Discover sensitive data and mask
- Prevent Unauthorized access to data
- Monitors for threats based user activity
- Risk dashboard: configuration, data, users

Benefits

- No special expertise needed: click-and-secure
- Saves time and mitigates security risks
- Defense-in-depth security for all customers

Oracle Databases

Compute and OS

Root-Of-Trust Card, Tenant Isolation, Signed Firmware

GENERAL AVAILABILITY

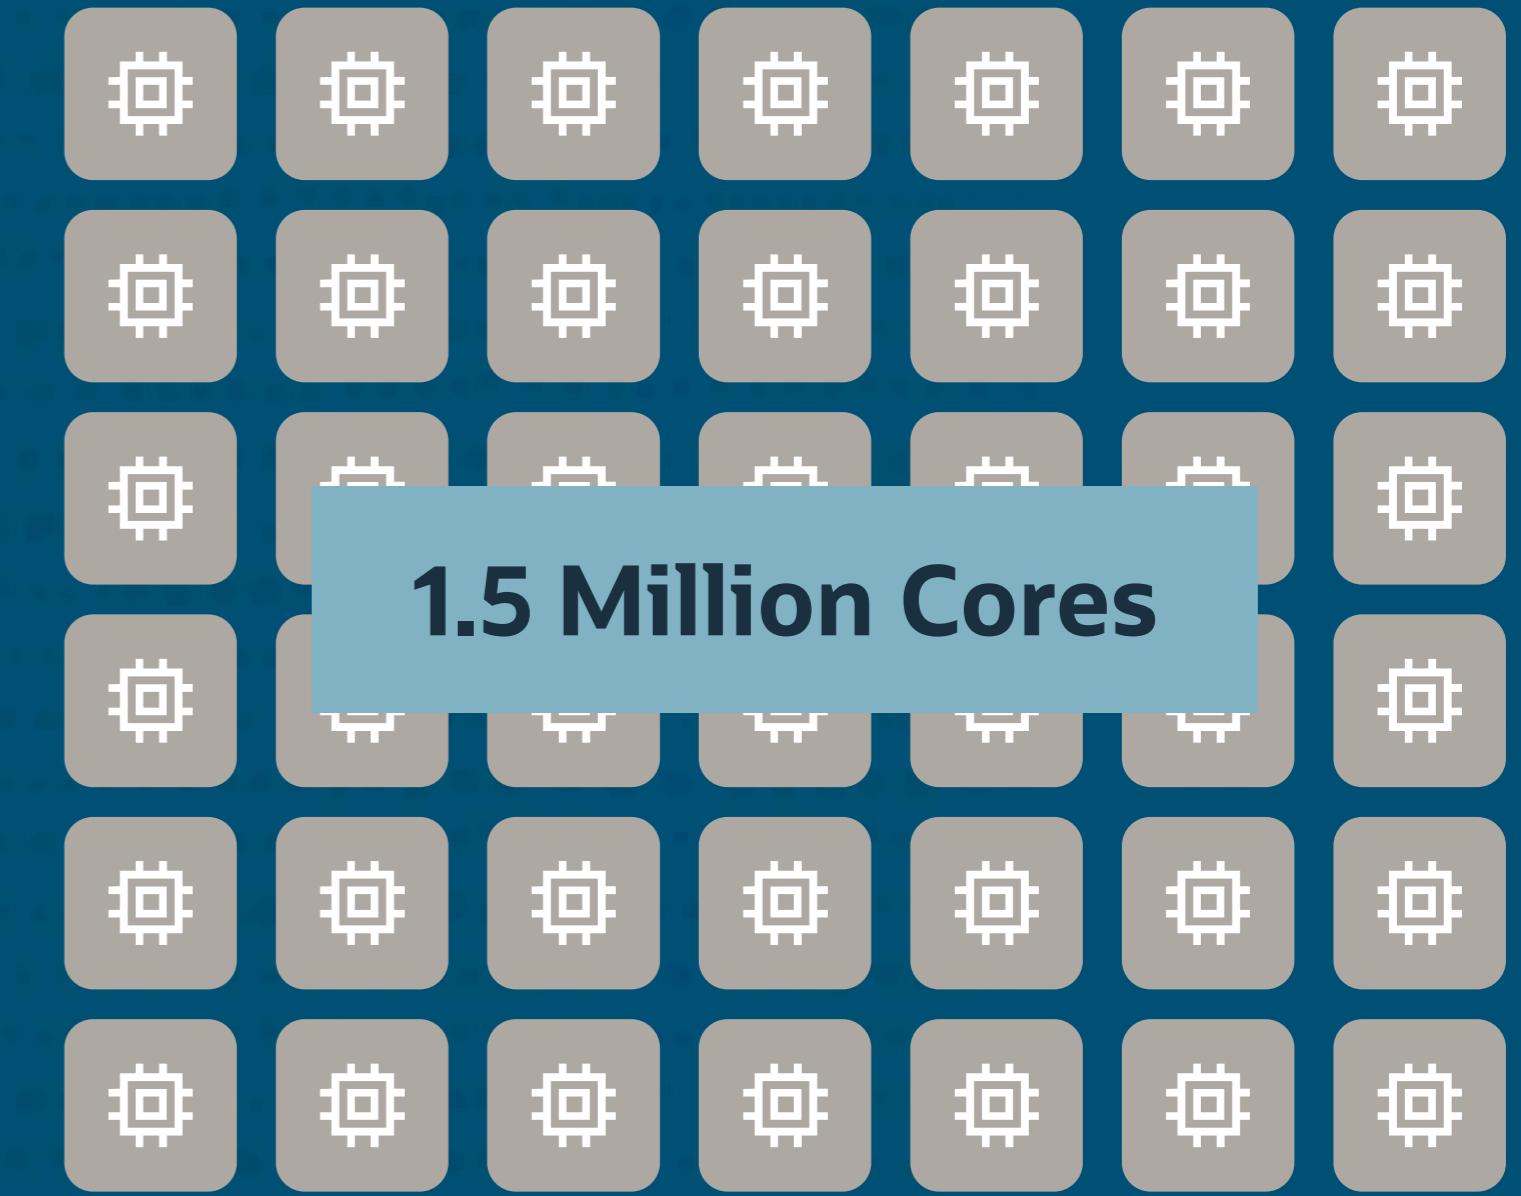

Oracle Autonomous Linux protects Oracle Cloud

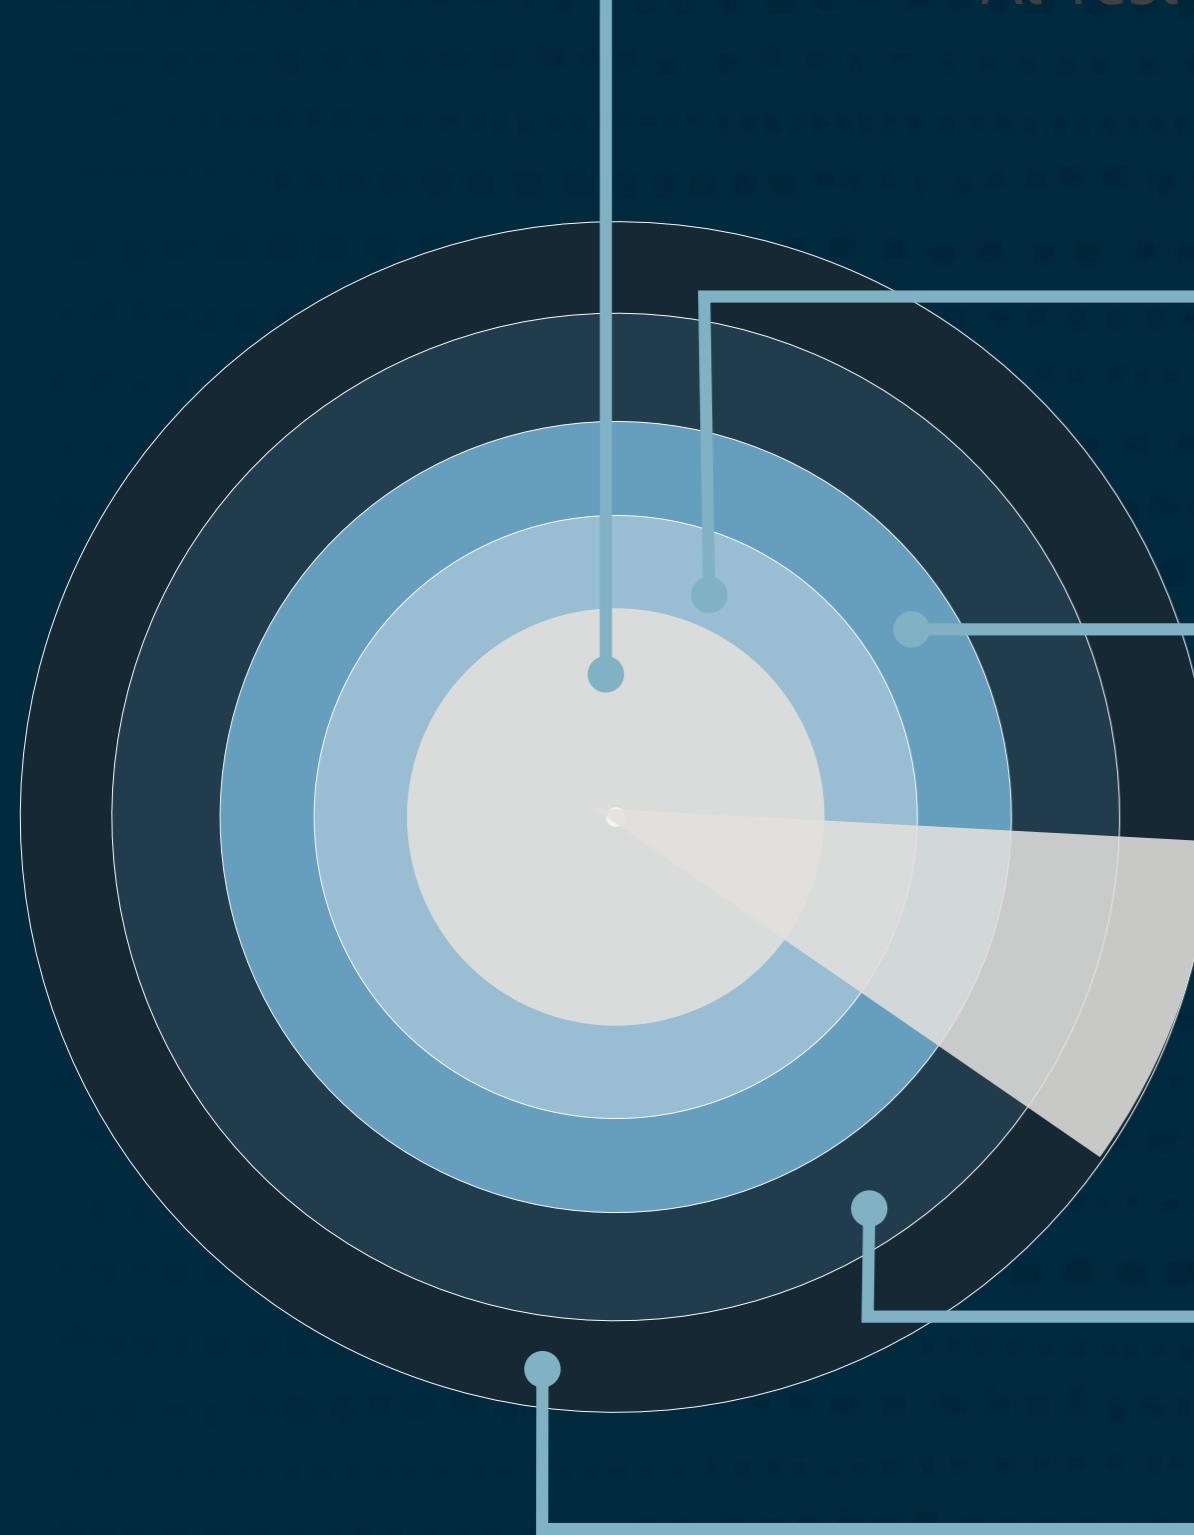

4 hours

Applied to

150M patches applied in OCI in 4 hours for Spectre/Meltdown Bugs—No Downtime

Storage and Database Safeguards

At-rest and in-transit crypto, Key Management options, Data masking

Compute and OS

Root-Of-Trust Card, Tenant Isolation, Signed Firmware

Network

SSL Load Balancing, FastConnect WAN, IPSec VPN, Network Firewall

Identity and Operator Access

Zero trust, Identity Federation, Role-Based Policy

Monitoring and Prevention

Posture Management, Threat Intelligence, Vulnerability, Logging

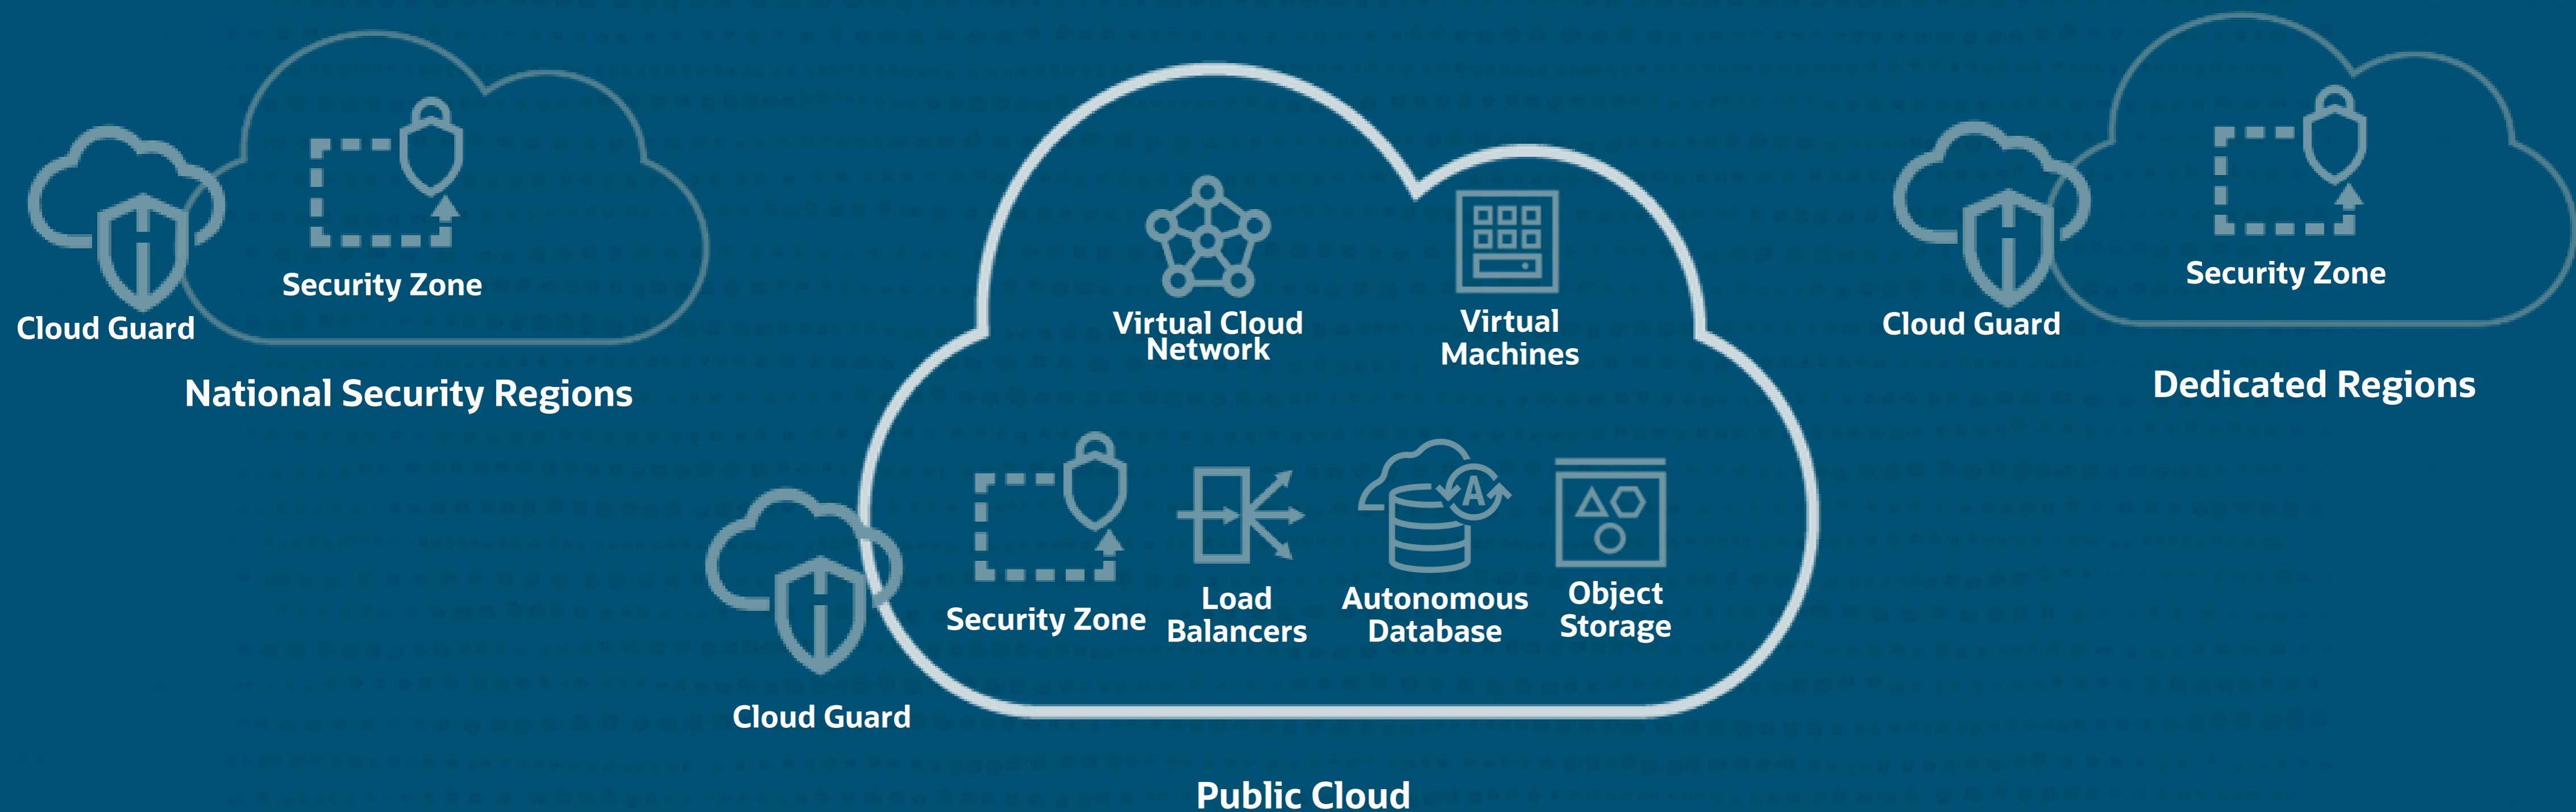

Internet and Edge

Global PoPs, DDoS protection, DNS, WAF

GENERAL AVAILABILITY

Oracle Security Zones and Oracle Cloud Guard

Simple and effortless proactive and reactive security posture management

Oracle Cloud Guard

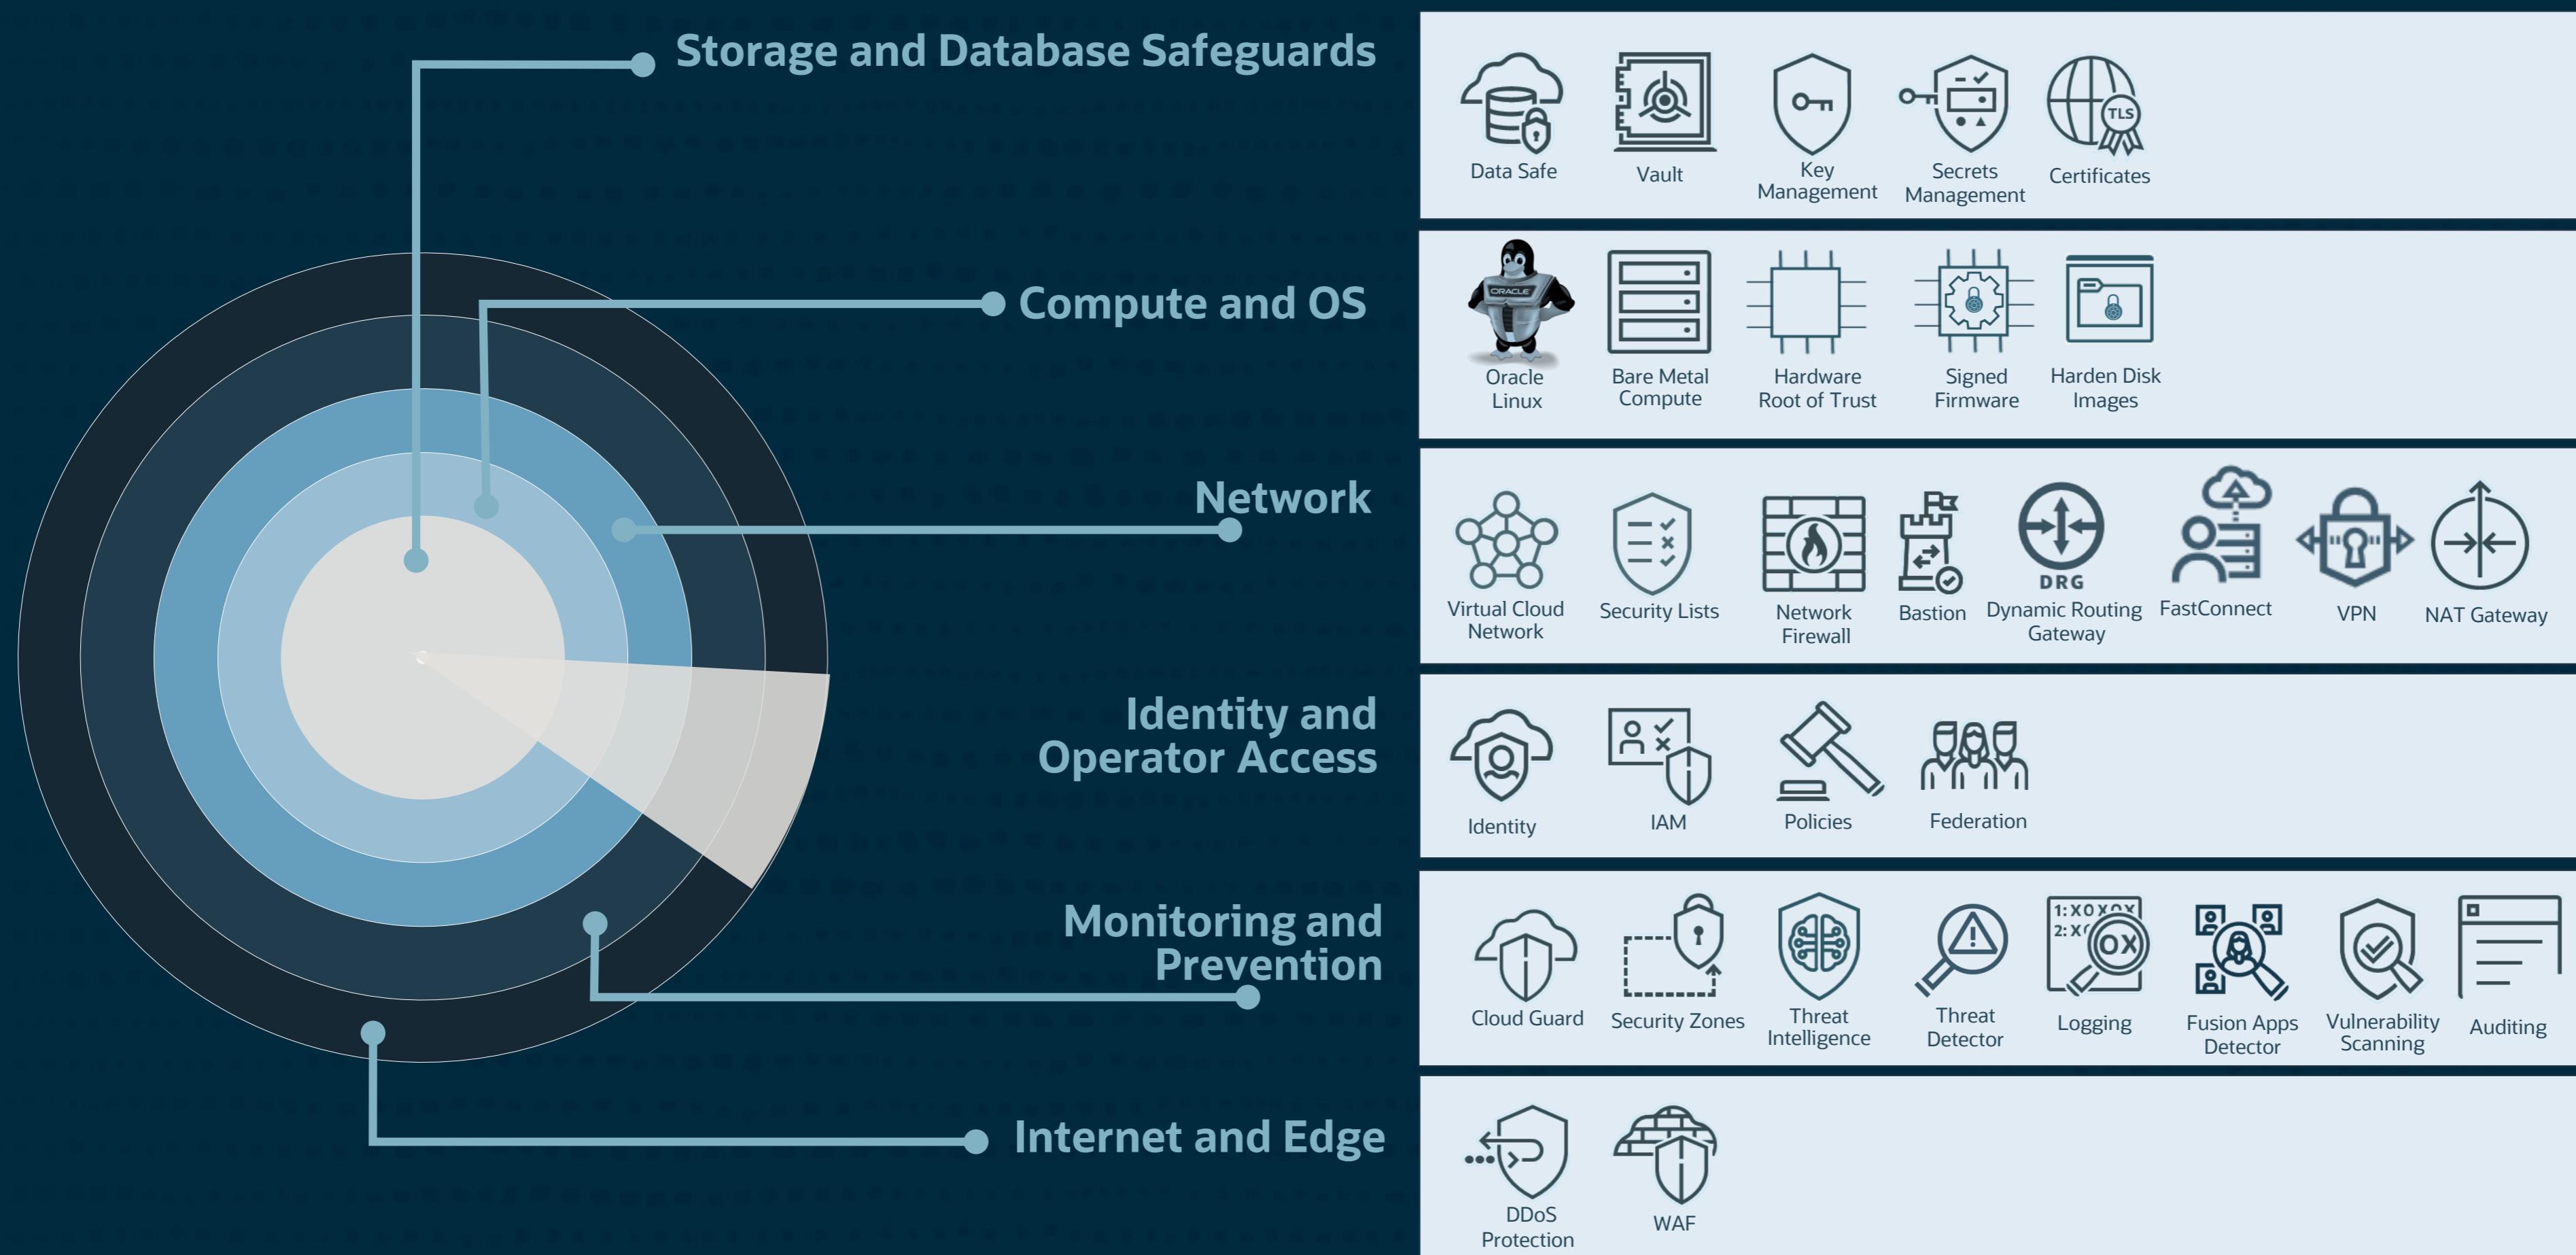

Continuously monitor your cloud environment
Automatic problem identification
Optional Automatic remediation

Security Zones

Extremely secure location
Security is always enforced
Designed for highly secure workloads

Oracle Security defense in depth

A complete solution at every layer

“

Cloud Guard was the first thing we did when we got our tenancy, it is a great security monitoring tool and we also use compartments, policies, and Logging Analytics to maintain visibility and control. Together with logs from OCI IAM identity domains, we're able to access all of our logs in a single location and customize the dashboards we need for complete visibility. The fact that this detailed view is all streamlined is a big win for customers.

”

Lance Braswell, Cloud Architect, Cisco Systems, Inc.

We bring cloud services to you

Dedicated cloud

A cloud just for you

LIMITED AVAILABILITY - NOW

Oracle Cloud Guard Fusion Applications Detector

Security posture management for your infrastructure and Oracle HCM and Oracle ERP

- Security for critical business apps
- Detections for sensitive PII
- Pre-configured & customized recipes

Cloud Guard Fusion
Applications Detector

AUTO ENABLED FOR ALL FUSION APPLICATIONS

OCI Web Application Firewall for Fusion Applications

- Security and safeguards for Fusion Apps
- Monitor and detect malicious attacks
- 24x7, Oracle Managed end to end

**OCI WAF for Fusion
Applications**

New partner-integrated security capabilities

Multicloud

your other providers

Hybrid cloud

We bring cloud services to you

Public cloud

Access OCI cloud services
from 40+ global regions

Dedicated cloud

A cloud just for you

GENERAL AVAILABILITY

Partner-integrated security services

Cloud-native firewall, powered by Palo Alto Networks' next-generation firewall (NGFW)

- URL filtering, intrusion prevention, & TLS inspection
- No additional security infrastructure
- Addresses regulatory requirements

Next-generation
firewall (NGFW)

LIMITED AVAILABILITY - NOW

Qualys scanning with OCI Vulnerability Scanning

- Integrated with OCI VSS
- Quickly identify vulnerabilities from Qualys agents and address them in OCI Vulnerability Scanning
- Fully managed, eliminating the work of patching agents

Qualys®

OCI Vulnerability
Scanning Service

Requirements to support distributed clouds

- ✓ Cross-cloud authentication, authorization, and token exchanges
- ✓ Integrated logging and telemetry
- ✓ Interoperable key and secrets management systems
- ✓ Integrated security monitoring
- ✓ Cross-cloud SDK, CLI, and UI compatibility

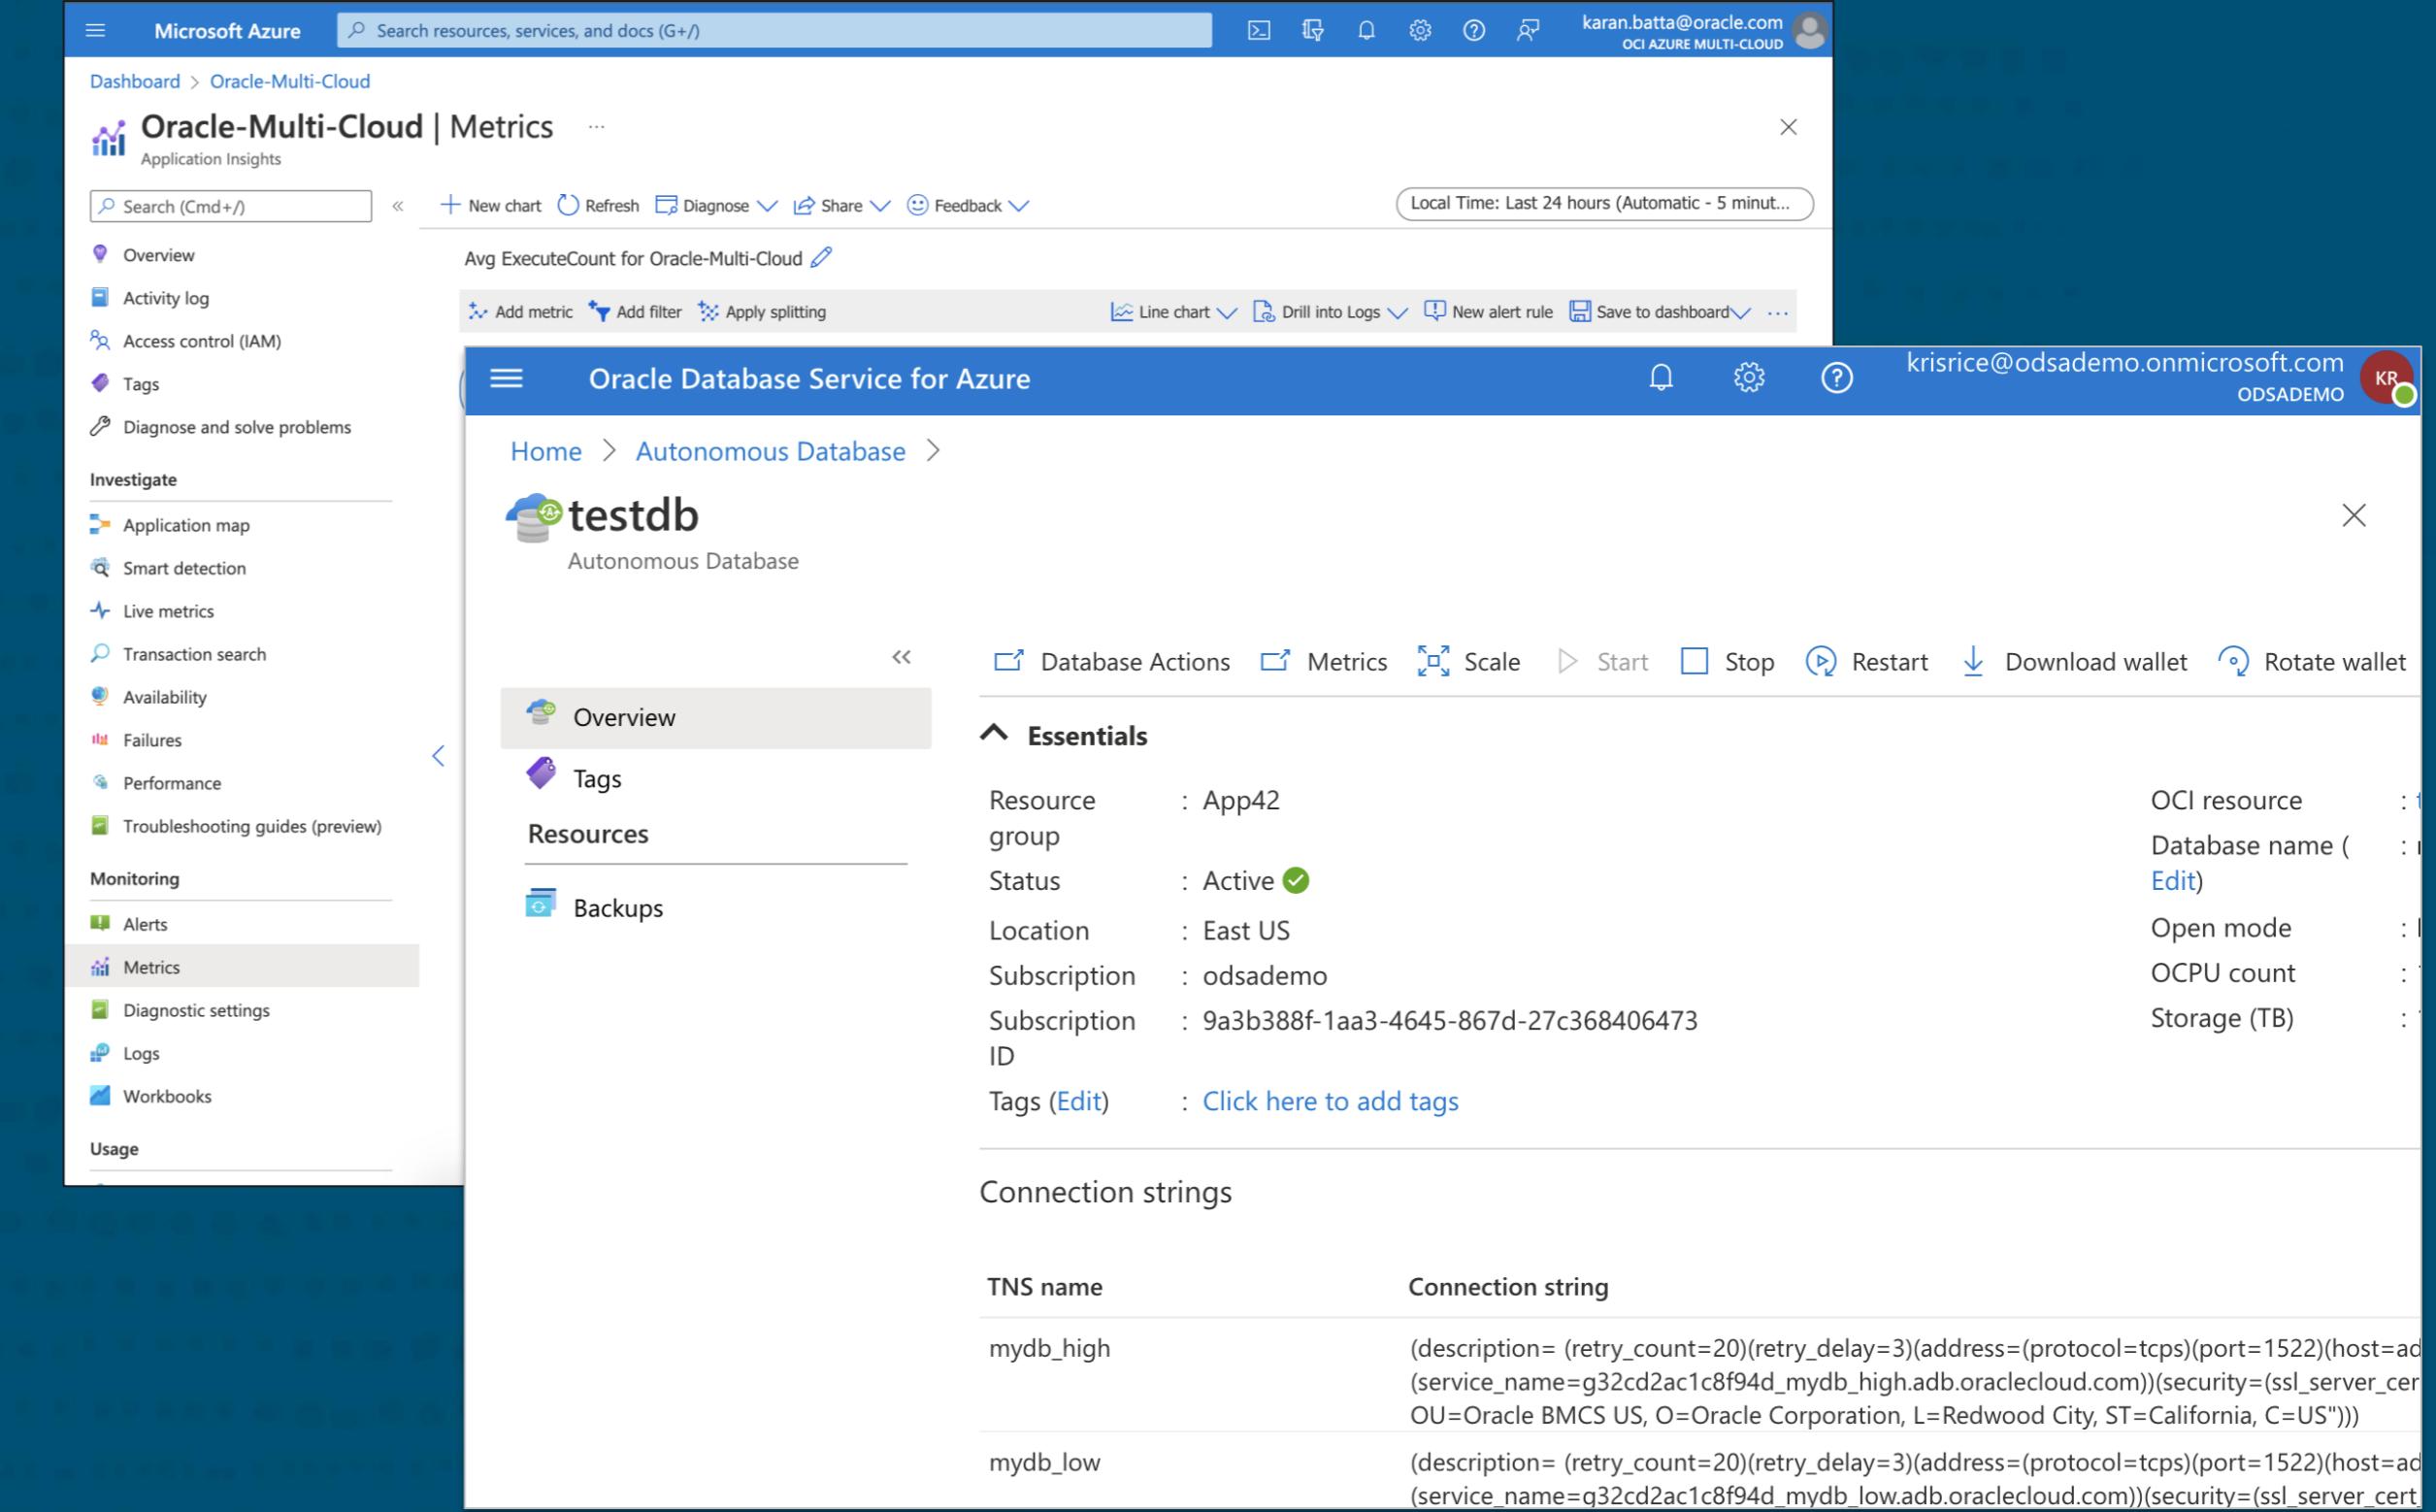

GENERAL AVAILABILITY

Oracle Database Service for Microsoft Azure

ORACLE
Cloud Infrastructure

 Microsoft Azure

Connect, provision, use your OCI database like an Azure resource

The screenshot shows two overlapping Azure application insights dashboards. The top dashboard is titled 'Oracle-Multi-Cloud | Metrics' and displays various monitoring options like 'Search (Cmd +/)', 'Overview', 'Activity log', and 'Metrics'. The bottom dashboard is titled 'Oracle Database Service for Azure' and shows details for an 'Autonomous Database' named 'testdb'. It includes sections for 'Overview', 'Tags', 'Resources', and 'Backups'. Under 'Essentials', it lists resource details such as group (App42), status (Active), location (East US), subscription (odsademo), and ID (9a3b388f-1aa3-4645-867d-27c368406473). The 'Tags' section has a link to 'Click here to add tags'. The 'Connection strings' section shows two entries: 'mydb_high' and 'mydb_low', each with its respective connection string.

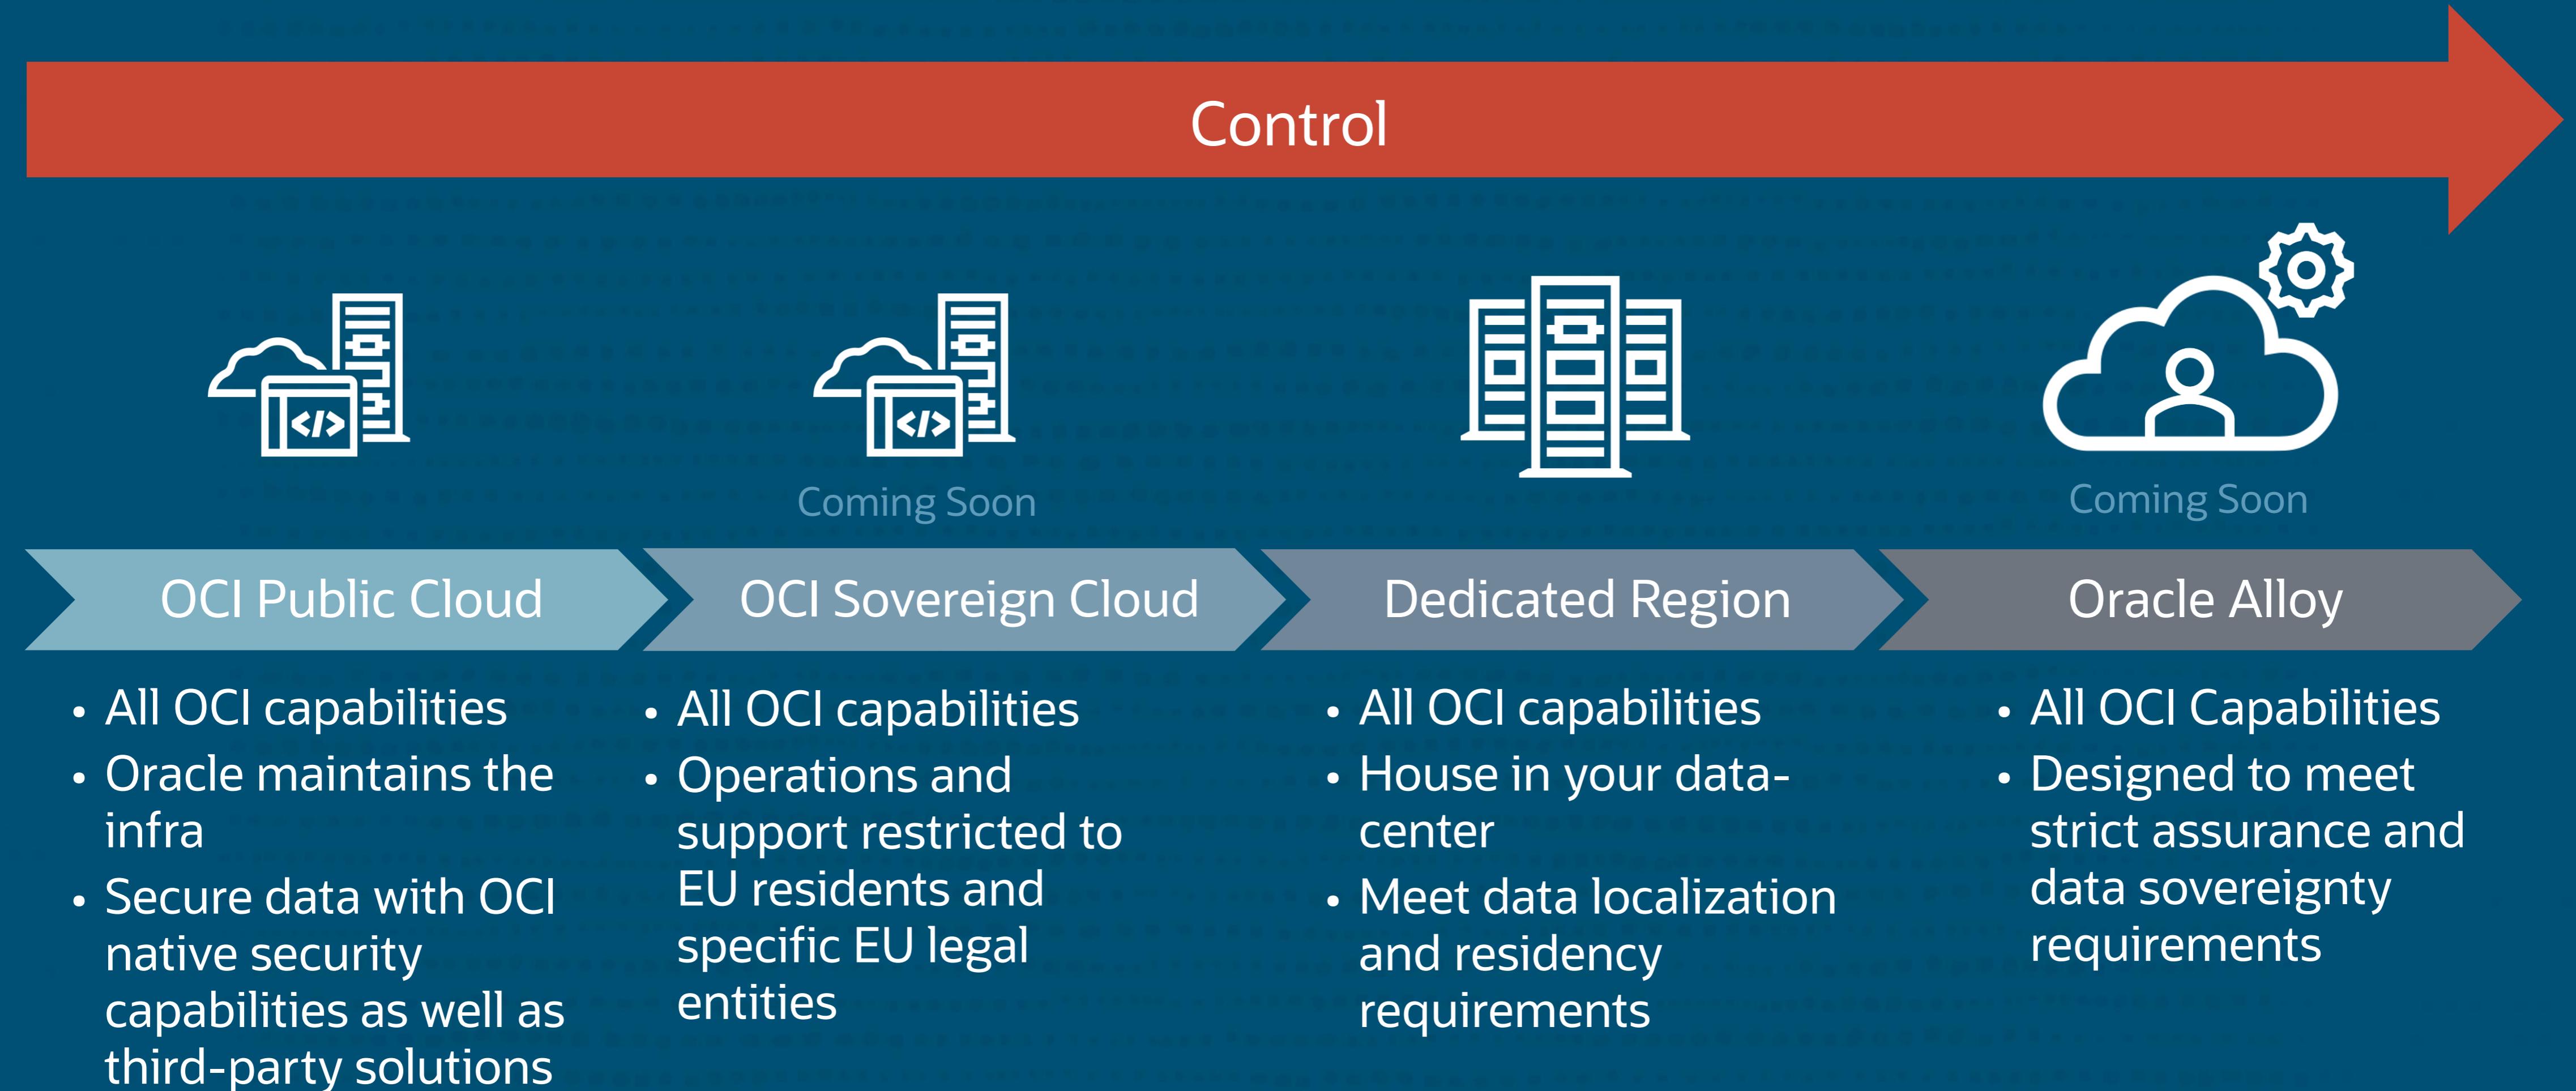

TNS name	Connection string
mydb_high	(description= (retry_count=20)(retry_delay=3)(address=(protocol=tcp)(port=1522)(host=ad... (service_name=g32cd2ac1c8f94d_mydb_high.adb.oraclecloud.com))(security=(ssl_server_cert OU=Oracle BMCS US, O=Oracle Corporation, L=Redwood City, ST=California, C=US"))))
mydb_low	(description= (retry_count=20)(retry_delay=3)(address=(protocol=tcp)(port=1522)(host=ad... (service_name=g32cd2ac1c8f94d_mydb_low.adb.oraclecloud.com))(security=(ssl server cert

- Automated identity, networking, logging, and monitoring integration
- Familiar Azure-native user experience
- < 2 ms latency private interconnection
- Access enterprise-grade Oracle database services
